STACKED Plate Barrier

The Stacked Plate Barrier is a fast deployment, security response and anti-terrorism product. It is ideal for all levels of government security such as government buildings and installations, airports, military units, guard units, border patrol, and embassies. It will also provide excellent security for police and fire departments, serpentine approaches, crowd control, security lanes, and vehicle control. Also, the bad guy cannot be hidden or use the barrier as a defensive, position cover.

The Stacked Plate Barrier can be used in a variety of applications including: traffic control and channeling, building security, gate approach, bridges, roads, work zones, construction areas, lane delineation, national and state parks, and parking lots.

The large wheels and handles allow it to be positioned by one person. Shipped knocked down for space savings and assembled on site. One person can deploy or move as the threat changes. It does not require any water or sand.

Illumination at night with optional light kit. Can be bound together with optional chain kit.

Length: 78" (Length) x 24" (Wide)
Height: 42"
Weight: 300 lbs.
