WEAPON CLEARING STATION

The **Weapon Clearing Station (WCS)** is designed to provide a safe way to make sure a weapon is properly cleared.

The polyethylene construction insures that it won't rust or corrode like metal barrels and the UV inhibitor prevents fading. The station is vented to keep fill media dry.

- **Service life is 15+ years**
- **For weapons using 7.62 rounds and smaller**
- **No sandbagging needed**
- **Attractive appearance. No more ugly, rusty steel drums or wood frames**
- **Lip Guard prevents damage to weapon**
- **Fork pockets makes it easy to relocate**
- **Polyethylene construction will not rust or mark the weapon.**

CREATIVE BUILDING PRODUCTS

*Don't "Think Safety"
KNOW you are safe!*

No longer will makeshift areas like this be necessary. The **Weapon Clearing Station** provides a safe, easy to use, and attractive appearance for weapon clearing.

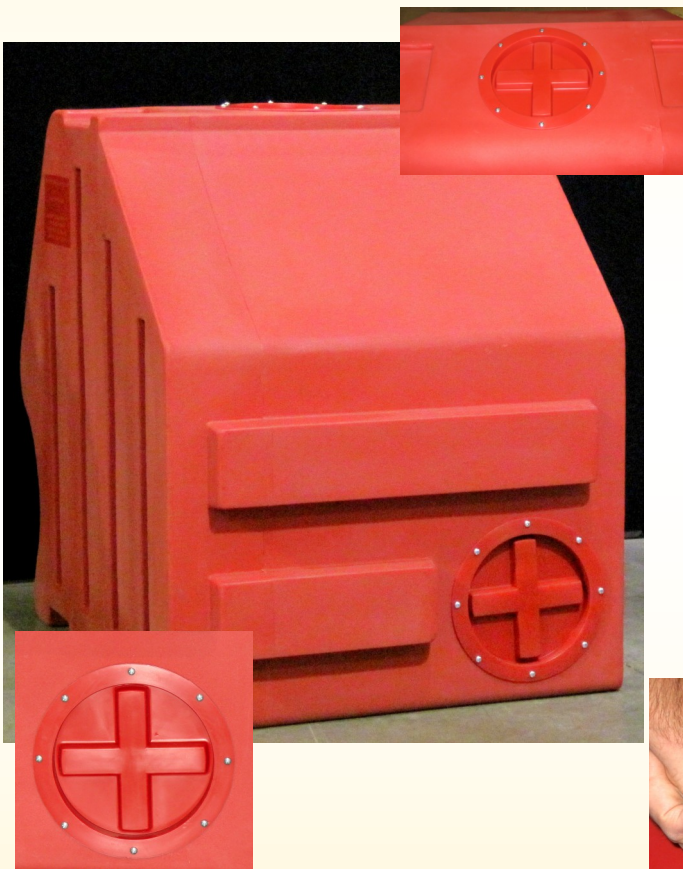

The 360° innovative design allows assurance that you are protected from any angle.

The **WCS** can easily be filled with sand through the top fill cap and provides a minimum of 15 inches of mitigation material all the way around the 3" x 4" muzzle insert.

The rear dump makes it easy to empty of fill media and the forklift pockets on the bottom make it easy to relocate.

The lip of the muzzle insert is raised to protect weapons against damage and minimize water entry.

Ease of use allows safe discharge of most rounds without damage
