PERIMETER SECURITY VEIL

NOW YOU SEE IT.....

NOW YOU DON'T.....

- **Blocks sniper's view**

The Perimeter Security Veil will greatly increase the warfighter's ability to view the exterior of the perimeter and maintain concealment from enemy view.

- **Observe enemy without being seen**

The PSV can be utilized to hide the view for your guards from enemy snipers. The PSV can be used to protect facilities that are crucial to national defense such as Tactical Operations Centers (TOC), Communications Command and Control (C3) Facilities, Aircraft, Vehicle or Towed Weapons, Petroleum, Oil, Lubricants (POL), Storage Facilities and Medical Units.

- **Quick and easy installation**

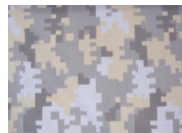

- **3 Camouflage Styles Available**

Manufactured in the USA of specially engineered fabric. The veil is 10 meters (approx. 33 ft.) long and 7 1/2 ft. tall. Includes all items necessary for attachment. The PSV is available in three Styles:

6409 HIGHVIEW DR

PERIMETER Security Veil

IN USE PHOTOS

Perimeter Security Veil viewed from outside a building being protected. The building is in Iraq.

From the inside looking out. This is the same building. Notice you can still make out details, male vs female, in uniform, etc.

An evaluation of the PSV was done by US Army Military Police School (USAMPS), concluding results showed that the PSV is a very useful way of blocking the enemy's view of the valuable assets inside of a facility, while allowing the warfighter the capability of detecting and assessing targets on the exterior of the perimeter.

The PSV has demonstrated that it meets or exceeds the requirements as determined by USAMPS. The PSV can be quickly, easily and efficiently attached to fences, walls or various other force protection items.

The veil has heavy duty eyelets spaced at 2 ft. intervals around the perimeter of the veil to make it easy to attach.

The PSV is available through GSA contract number GS-07F-9574S

Velcro ports can be install in the field.
